JAVED MONDAL

Java Full Stack Developer | Spring Boot | React.js | Microservices

Kolkata, West Bengal, India | (+91) 7318834541 | javedmondal308@gmail.com | linkedin.com/in/javed308

PROFESSIONAL SUMMARY

Java Full Stack Developer with 3+ years of experience designing and building scalable enterprise and multi-tenant SaaS applications using Java, Spring Boot, Microservices, React.js, and JavaScript. Skilled in REST API development, MySQL database design, and Kafka/Redis-based distributed systems. Experienced deploying containerized services with Docker, Kubernetes, and AWS, and implementing RBAC-based access control, with a track record of improving concurrency, performance, and integration efficiency.

TECHNICAL SKILLS

Java & Backend: Java, Spring Boot, Spring Cloud, Spring Security, REST APIs, Hibernate, JPA, Role-Based Access Control (RBAC)
Architecture & Core Java: Microservices, Hexagonal Architecture, Event-Driven Architecture, Multithreading, Concurrency, Java Virtual Threads
Databases, Caching & Messaging: PostgreSQL, MySQL, Cassandra, Redis, Apache Kafka
Cloud & Development Tools: AWS, Docker, Kubernetes, Maven, Git, Postman
Frontend: JavaScript, React.js

PROFESSIONAL EXPERIENCE

Keross Research and Development — Kolkata, West Bengal, India

Software Engineer Level 2 *Apr 2025 – Present*

- Architected backend modules using Hexagonal Architecture to decouple business logic from infrastructure, improving maintainability and integration flexibility across services.
- Developed reusable platform SDKs and shared libraries, reducing cross-team integration time by approximately 40%.
- Introduced Java Virtual Threads to improve concurrency, throughput, and resource utilization for high-traffic backend services.
- Containerized and deployed microservices using Docker and Kubernetes, including workloads on AWS EKS and standalone Kubernetes environments.
- Contributed to a scalable, highly available platform architecture supporting approximately 99% system uptime, applying full-stack capability across Java, Spring Boot, React.js, and JavaScript.

Software Engineer Level 1 *Jun 2023 – Mar 2025*

- Engineered greenfield architecture for IKON V9, a multi-tenant SaaS platform comprising approximately 14 microservices built with Java, Spring Boot, and REST APIs.
- Developed user-management, role-assignment, RBAC, and access-control capabilities, enabling secure authentication and authorization across the platform.
- Built a centralized App Store supporting application subscriptions and custom request workflows, contributing to approximately 40% improvement in client engagement and onboarding efficiency.
- Resolved application latency bottlenecks on the IKON V8 platform and implemented fault-tolerance mechanisms to improve reliability.
- Delivered full-stack functionality across backend, MySQL database, integrations, and React.js/JavaScript frontend for scalable enterprise applications.

Junior Software Engineer Trainee *Dec 2022 – May 2023*

- Developed backend functionality for web applications using Java and Spring Boot within cross-functional Agile teams.
- Designed and optimized MySQL database schemas to improve data storage, retrieval, and application performance.

EDUCATION

Master of Computer Applications (MCA) — Aliah University, Kolkata 2019 – 2022 | CGPA: 8.65
Bachelor of Science in Mathematics — Aliah University, Kolkata 2016 – 2019 | CGPA: 6.38

CERTIFICATIONS

Java Basic — HackerRank | Java Functional Programming — Udemy | Spring Boot — Udemy
